#### **Reliability Prediction edited**

Reliability predictions are one of the most common forms of reliability analysis. Reliability predictions predict the failure rate of components and overall system reliability. These predictions are used to evaluate design feasibility, compare design alternatives,

#### **Reliability analysis - LTH**

reliability of complex technical installations was a problem. As an example the modern warships at the time were only operational for attack/defence in about 60 % of the time. Similar effects were observed on the reliability of e.g. the VII V2 rocket systems -the first of many launches were unsuccessful. These events were the real initiators of the reliability theory for technical
